

The Redpoll

Newsletter of the Arctic Audubon Society, Fairbanks, Alaska

Vol. 32 Issue No. 3

www.arcticaudubon.org

December 2009

Mission of Arctic Audubon: Earth has unparalleled natural diversity, productivity, and beauty, and provides for life. Recognizing the full value of nature, we work to protect Alaskan ecosystems by encouraging research, education, and management that will contribute to appreciation and good stewardship of this natural heritage. We also strive to conduct our own lives in harmony with nature.

The Arctic Audubon Society publishes The Redpoll for its members monthly fall through spring. National Audubon Society (NAS) dues are \$35; new members are \$20. NAS membership includes local chapter dues. Chapter only membership is \$10 and includes the newsletter.

Fairbanks Christmas Bird Count on December 19th

Join the Arctic Audubon Society for the annual Fairbanks Christmas Bird Count on Saturday, December 19th. CALL TODAY* to join in and enjoy the winter birds for fun and for science. The count circle (see page 3) includes the top of Ester Dome, parts of the Chena and Tanana Rivers, the dump, and plenty of typical Interior habitat. Plan to join us after dark for the compilation and potluck dinner (meat provided) at the Kunkel Community Center on Goldstream Road near Ivory Jack's.

This year is the 110th count for the continent, and the 49th count for Fairbanks. Next year will be a landmark count for us. We would love to have your ideas for celebrating 50 years of Christmas Bird Counts in Fairbanks. Our count has certainly grown over the years, yet some of the same people who gathered for the first count are still counting. It is amazing that Fairbank's birders' sharp eyes have found 68 different species alive in the "dead of winter" over the course of 49 counts. We welcome you to join them and discover the enjoyment from a day outside helping to build a database of information on bird population trends unmatched by any other wildlife census. See you there!

**It is important to contact your area coordinator as soon as possible. See the enclosed information page with the area maps and contact information.*

Goldstream Valley Area May Lose Protections

Reprinted with permission from the December 2009 edition of the Interior Trails Quarterly

The Goldstream Public Use Area, a popular winter playground just north of Fairbanks, is in danger of losing its protected status next year. The area was created in 1990, but the law that created it has a 2010 sunset provision, which means the area will no longer have special protection.

The nearly 2,000-acre area extends east up Goldstream Valley from Ballaine Road. A very small portion of it lies on the west side of Ballaine. It has a network of trails that are used extensively in the winter by snowmachiners, mushers, skiers, winter bikers, runners, walkers, and snowshoers. Much of the area is boggy in other seasons, but it is still used by berry pickers, canoers, bird watchers, and hunters.

Senator Joe Thomas plans to submit a bill this session that would either extend the sunset provision or eliminate it, making the public use area permanent. However, getting the bill passed in just one session will be difficult, says Grier Hopkins, an aide to Thomas.

Thomas needs support from people who want the public use area to remain. His office can email a letter of support to which people or groups can add their name. If you are interested in helping, contact Hopkins (phone: 907/456-8161; email: Grier_Hopkins@legis.state.ak.us).

Fairbanks Area Hiking & Birding Map

The Fairbanks Area Hiking & Birding Guide is sold in Fairbanks for \$12 at the Alaska Bird Observatory Education Center, Beaver Sports, Friends of Creamer's Field Farmhouse Visitor Center, and Gulliver's Books. Maps can be ordered via email at arcticaudubon@gmail.com.

Alaska eBird

Alaska eBird is a great way to record your observations, manage your life list, and help contribute to avian monitoring and conservation in Alaska. Visit the Alaska eBird website, which includes photos, interesting birding news and features, as well as observation records:

<http://ebird.org/content/ak/>

Email Delivery of Arctic Audubon Newsletter

E-Delivery of Arctic Audubon's newsletter, *The Redpoll*, is now an option. Contact the newsletter editor at zalar@alaska.net to receive your newsletter via email instead of by postal delivery.

 This newsletter is printed on *Harbor 100* paper that uses 100% post-consumer recycled materials and is certified by the Forest Stewardship Council. According to the Grays Harbor Paper website (www.ghplp.com/paper.html) no trees are cut down and no fossil fuels are burned in the production of *Harbor 100*.

New Waterford Trail Parking Area Created

Reprinted with permission from the December 2009 edition of the Interior Trails Quarterly

The Waterford Trail now has better parking thanks to the Goldstream Alaska Road Service Area and some volunteers. The trail is north of Goldstream Valley and takes off from the intersection of Waterford and Molly roads. For years trail users who drive to the trailhead have had to park on the side of the road. In winter, this meant risking getting stuck in the ditch if you pulled over too far or parking too far out in the road, creating a traffic hazard.

This year the road service area, along with help from neighborhood volunteers, widened a spot on the shoulder of Molly Road for parking. Trail users who are driving up Waterford Road, should turn onto Molly Road and drive past the first driveway on the right. The parking area is on the north side of Molly just a little past the driveway.

Alaska Bird Observatory Events

December 12: Second day of the Fairbanks FeederCount. Count form is on ABO's website, www.alaskabird.org, under Citizen Science.

February 17, 7:00 pm: Kanuti Whimbrels: Unlocking the mystery of their southward migration with biologist Chris Harwood at the Alaska Bird Observatory.

March 6: Third and final day of the Fairbanks FeederCount. Please return your datasheets to the Alaska Bird Observatory!

Species Seen on One or More Fairbanks, Alaska (AKFA) Christmas Bird Counts 1965–2009 (x1968)

American Widgeon	Peregrine Falcon	Golden-crowned Kinglet
Mallard	American Coot	Townsend's Solitaire
Northern Shoveler	Rock Pigeon	American Robin
Pintail	Great Horned Owl	Varied Thrush
Lesser Scaup	Snowy Owl	European Starling
Harlequin Duck	Northern Hawk Owl	Bohemian Waxwing
White-winged Scoter	Great Grey Owl	American Tree Sparrow
Bufflehead	Boreal Owl	Savannah Sparrow
Common Goldeneye	Downy Woodpecker	Fox Sparrow
Barrow's Goldeneye	Hairy Woodpecker	Lincoln's Sparrow
Common Merganser	American Three-toed Woodpecker	White-crowned Sparrow
Red-breasted Merganser	Black-backed Woodpecker	Golden-crowned Sparrow
Ring-necked Pheasant	Northern Shrike	Dark-eyed Junco
Ruffed Grouse	Gray Jay	Rustic Bunting
Spruce Grouse	Black-billed Magpie	Snow Bunting
Willow Ptarmigan	Common Raven	Rusty Blackbird
Rock Ptarmigan	Black-capped Chickadee	Gray-crowned Rosy Finch
Sharp-tailed Grouse	Boreal Chickadee	Pine Grosbeak
Bald Eagle	Red-breasted Nuthatch	White-winged Crossbill
Sharp-shinned Hawk	Brown Creeper	Common Redpoll
Northern Goshawk	American Dipper	Hoary Redpoll
Merlin		Pine Siskin

Each Christmas Bird Count lasts 24 hours and covers a 177 square mile circle that is 15 miles in diameter. The Fairbanks count is centered on the intersection of Dalton Trail and Yankovich Road. The circle includes the top of Ester Dome, parts of the Chena and Tanana Rivers, the dump, and plenty of typical Interior habitat. The **object of the count** is to cover as much of the circle as possible while identifying and counting birds without duplication. Since our daylight hours are limited we need many observers willing to cover assigned areas.

- **Feeder watchers** are welcome to participate by counting the largest number of birds seen together for each species on that day.
- During "**count week**" (three days before and after count day) additional species seen or heard within the count circle can be added to the final list of species observed.
- Please use the **data sheet** on the reverse to record participants, numbers of birds and effort (time spent looking by various means). Be sure to contact your area coordinator at or before the potluck.

A \$5 fee is required from all field observers over 18 years old. Observers under 18, feeder watchers, and owl listeners are not required to pay but will not receive the CBC issue of *American Birds* unless they choose to pay. Make sure we have your correct mailing address and let us know if you do not want to receive the CBC issue.

Plan to join us after dark for the **compilation and potluck dinner** (meat provided) at the Kunkel Community Center on Goldstream Road near Ivory Jack's. See directions at www.goldstreamvalley.net/kunkel. Doors will open at 4:00 pm and dinner is at 5:00. Please bring a simple dish to share. BYOEU (bring your own eating utensils) if possible. We look forward to seeing you there!

The Christmas Bird Count is on line with data from 1900 to present at www.audubon.org.

If you can't attend the potluck be sure to contact your area coordinator before 5:00 pm. Data may be reported to 460-4659 after 4:00 pm. Final results will be published in the February issue of *The Redpoll*.

Highlights for Mist Net 4

Adopted by Arctic Audubon Society

In 2009, The Alaska Bird Observatory (ABO) completed their 19th year of banding songbirds at the Creamer’s Field Migration Station, and Arctic Audubon Society once again participated by sponsoring Mist Net 4. ABO operated the station with the help of over 60 volunteers with 1,400 hours of service and banded approximately 5,782 birds of 39 species from April 20–September 30, 2008. More than 2,600 people visited the Station and attended banding demonstrations.

Some unusual captures this year include a Wilson’s Snipe, an American Three-toed Woodpecker, a Yellow-bellied Flycatcher, a Golden-crowned Sparrow, and five Northern Shrikes. Full details of the banding season are available at www.alaskabird.org

Mist Net 4	
Species	Total
Dark-eyed Junco	22
Common Redpoll	11
Yellow-rumped Warbler	10
Black-capped Chickadee	9
Swainson’s Thrush	6
American Robin	4
Orange-crowned Warbler	3
Fox Sparrow	2
American Tree Sparrow	2
Hammond’s Flycatcher	1
Gray-cheeked Thrush	1
Hermit Thrush	1
Ruby-crowned Kinglet	1
Total	73

Take a Mid-Winter Nature Break With the Great Backyard Bird Count

February 12-15, 2010

Bird watchers coast to coast are invited to take part in the 13th annual Great Backyard Bird Count, Friday, February 12, through Monday, February 15, 2010. Participants in the free event will join tens of thousands of volunteers of all levels of birding experience to count birds in their own backyards, local parks or wildlife refuges.

Each checklist submitted by these “citizen scientists” helps researchers at the Cornell Lab of Ornithology and the National Audubon Society learn more about how the birds are doing—and how to protect them. Last year, participants turned in more than 93,600 checklists online, creating the continent’s largest instantaneous snapshot of bird populations ever recorded.

Anyone can take part in the Great Backyard Bird Count, from novice bird watchers to experts. Participants count birds for as little as 15 minutes (or as long as they wish) on one or more days of the event and report their sightings online at www.birdcount.org.

Bird populations are always shifting and changing. For example, 2009 GBBC data highlighted a huge southern invasion of Pine Siskins across much of the eastern United States. Participants counted 279,469 Pine Siskins on 18,528 checklists, as compared to the previous high of 38,977 birds on 4,069 checklists in 2005. Failure of seed crops farther north caused the siskins to move south to find their favorite food.

On the www.birdcount.org website, participants can explore real-time maps and charts that show what others are reporting during the count. The site has tips to help identify birds and special materials for educators. Participants may also enter the GBBC photo contest by uploading images taken during the count. Many images will be featured in the GBBC website’s photo gallery. All participants are entered in a drawing for prizes that include bird feeders, binoculars, books, CDs, and many other great birding products.

For more information about the GBBC, visit the website at www.birdcount.org. The Great Backyard Bird Count is made possible, in part, by generous support from Wild Birds Unlimited.

Galveston Ornithological Society Offers Bird Photos & Commentary via Email

The Galveston Ornithological Society is offering a free opportunity as part of their environmental education program. They have an email list that anyone can join for as long as they like. The list will provide bird pictures (low resolution to avoid oversize files) and educational commentary on the birds. The email addresses will not be shared and subscribers can get off the list at any time. To join this email list, contact the Galveston Ornithological Society at galornsoc@earthlink.net.
