Newsletter of the Arctic Audubon Society

Vol. 43 Issue No. 2

Mission of Arctic Audubon: Earth has unparalleled natural diversity, productivity, and beauty, and provides for life. Recognizing the full value of nature, we work to protect Alaskan ecosystems by encouraging research, education, and management that will contribute to appreciation and good stewardship of this natural heritage. We also strive to conduct our own lives in harmony with nature.

# How Arctic Audubon Will Communicate with You!

new year is an opportunity to renew, review, and reimagine. Your Arctic Audubon Board is discussing how best to communicate with members. The "Newsletter" committee has been renamed "Communications" committee to reflect additional ways we share information. Your Board recently decided to transition to electronic communications to members, maintain our Facebook page, and possibly mail postcard notices about programs and field trips. Your ideas and opinions are needed and welcomed! Please share your thoughts or concerns via email, arcticaudubon@gmail.com.

#### Email Communication

- MailChimp will be used to maintain the list of email addresses. A button on Arctic Audubon's website will make it easy to submit your email address if we don't already have it.
- Arctic Audubon will not overwhelm members with emails (1-2 per month at most). Each email includes an "unsubscribe" link at the bottom.

#### Needed: a Communications Chair

Would you volunteer to guide Chapter communications as chairperson? Help decide what our members should know. The position and responsibilities are not yet clearly defined. The Chairperson would probably think about what information members should have, contact the appropriate person to write an article, format and send the email. The Membership Chair will manage the email list.

#### Does Arctic Audubon have YOUR email address?

Currently, Arctic Audubon has email addresses for over half of our members. By mid-February, our website will include a button to submit your address. We hope to send our first email to members by then. If you don't hear from Arctic Audubon, be sure to submit your email address.

▲ rctic Audubon hopes to hold spring field trips And looks forward to resuming public programs when the pandemic is under control and the Noel Wien Library auditorium is available. Thanks for your membership and participation!

## Fairbanks Christmas Bird Count: Remarkable in Many Ways Christmas Bird Count Results Inside

ecember 19, 2020 was the 60<sup>th</sup> annual Fairbanks Christmas Bird DCount. It was a remarkable day in many ways perhaps starting with the fact that we were able to hold the count safely amid a global pandemic! Along with our long-time cadre of area coordinators, we had three new coordinators join us this year. Dave Hejna took over the University area from John Wright, Maria Berger took over Goldstream East from Gail Mayo, and April Harding-Scurr took over Ester from Claire Stuyck. We had a record number of 157 participants this year—perhaps partially due to the cancellation of almost all traditional holiday events. All those extra eyes at feeders and in the field counted higher than normal numbers of Three-toed, Hairy, and Downy Woodpeckers, Black-capped and Boreal Chickadees, Nuthatches, Canada Jays and Waxwings.

There were also some very unusual bird sightings this year. A Sharpshinned Hawk seen in the University area may have been the rarest find. However, USFWS biologist Ted Swem, counting Ravens at the landfill saw four individual Bald Eagles. Prior to 2020, single Eagles had only been noted twice before. To have four birds in the area at once is truly remarkable. The star of 2020 though, may have been the very common (and this year extraordinarily abundant) Redpoll. In 2019, over 100 people scouring our CBC area found only 41 Redpolls total. This year, the tiny finches were everywhere, and a record total of 8,629 were counted.

Thanks to all who participated this year. Hopefully, our new volunteers will join us again next year and 2021 will find us back sharing good food, comradery, and our avian finds of the day at our traditional compilation potluck.
